

Scorva

Standard Operating Procedure for Coordinators & Reviewers

Document version

1.2

Last updated

June 2026

1 Document purpose

This Standard Operating Procedure (SOP) describes how to use the **Scorva: The Review Management System** WordPress plugin from first login through project setup, marking, reporting, and project closure. It is written for two primary audiences:

Role	Responsibility	Workspace
Coordinators	Maintain the student registry, configure projects (panels, reviewers, rubrics), monitor progress, export committee reports, and close projects safely.	Coordinator
Reviewers	Enter criterion marks and attendance for assigned students only, freeze personal scores when complete, and (for panel heads) manage panel reports and unfreeze requests.	Reviewer

Quick navigation: Part I covers coordinators; Part II covers reviewers. Shared concepts (login, terminology, troubleshooting) appear first. Figures marked with live screenshots use captures from `npm run sop:screenshots`; remaining figures show placeholders until captured manually.

2 Shared concepts

2.1 What Scorva replaces

Scorva replaces spreadsheet-and-email marking workflows with a governed pipeline:

Setup

Registry → project wizard
→ confirmed rubrics

Marking

Reviewers enter draft/submitted marks per criterion

Deliverables

Live views + Excel/CSV exports + panel reports

2.2 Terminology

Term	Meaning
Project	A review event (formerly “session”). Has lifecycle: Draft → Active → Closed.
All Students	Institution-wide student registry shared across projects.
Panel	A group of students reviewed together (e.g. Panel A).
Review round	A rubric-backed marking period within a project (e.g. “Oral presentation”).
Rubric	Weighted criteria with max marks. Must be confirmed before marking opens.

Assignment	A reviewer’s scope: project + review round + panel.
Draft mark	Saved but not final; can be edited freely while marking is open.
Submitted mark	Final criterion entry for that reviewer (subject to freeze/lock rules).
Flagged mark	Criterion score changed after rubric re-confirmation; visible to coordinators.
Portal credentials	A one-time login URL + password emailed to a reviewer; no WordPress account required.

2.3 Access URLs

Replace `your-site.edu` with your institution’s WordPress domain.

Coordinator workspace

`https://your-site.edu/reviews/`

Reviewer marking workspace (portal link)

`https://your-site.edu/reviews/mark/?token=...`

Figure 1: Landing page shown to unauthenticated visitors at `/reviews/``.

2.4 Signing in

2.4.1 Coordinators

Coordinators sign in with their WordPress account:

Coordinator

Log in as coordinator

1. Navigate to <https://your-site.edu/reviews/>.
2. Click **Log in**. You will be redirected to the WordPress login page.
3. Enter your username/email and password.
4. After login, you are routed to the Coordinator dashboard at </reviews/>.
5. Users with both coordinator and reviewer roles land on the Coordinator dashboard; use the top navigation to switch to the Marking workspace.

2.4.2 Reviewers — portal access (no WordPress account needed)

Reviewers receive a personalised **invitation email** from their coordinator. The email contains:

- A **Review link** (unique URL with an access token)
- A **Password** for that link

Reviewer

Log in as reviewer via portal

1. Open the most recent invitation email from your coordinator.
2. Click the **Review link** (or paste it into a browser).
3. On the password screen, enter the **Password** from the same email.
4. Click **Open review portal**. You are taken directly to your assignments.
5. If the link shows “This review link is not valid”, open the **most recent** invitation email — earlier emails contain expired links.

Scorva: The Review Management System

Reviewer access

Enter the password from your invitation email to start reviewing. If you received more than one email, use the most recent password.

Password

Open review portal

Figure 2: Reviewer portal login screen (password entry after clicking the review link).

Figure 3: Workspace top navigation with user menu and role switcher (when applicable).

If you received more than one invitation email, always use the **most recent** password — earlier tokens are invalidated when credentials are regenerated. Contact your coordinator if you cannot access the portal.

Part I

Coordinator procedures — registry, setup, progress, reports, closure

3 Coordinator overview

Coordinator

Coordinators orchestrate the full review lifecycle:

1. Maintain **All Students** (registry)
2. Create projects and run the **Setup wizard**
3. Confirm rubrics and **open for marking**
4. Monitor **Progress** and chase incomplete marking
5. Download **Reports** for committees
6. **Close** the project when complete

Figure 4: Coordinator sidebar navigation: Dashboard, All Students, and in-project sections.

4 Dashboard & creating a project

4.1 Viewing projects

The **Dashboard** lists all projects as cards with status chips:

- **Draft** — setup in progress; marking not yet open
- **Active** — marking is open for confirmed rubrics
- **Closed** — marking stopped; reviewer portal access may be disabled

Filter by status using the chips at the top. Click a project card to open its setup wizard.

Figure 5: Project dashboard with status filters and project cards.

4.2 Creating a new project

Coordinator

Create a project

1. Add students in **All Students** first (registration number and name are required).
2. On the Dashboard, click **Create project**.
3. Enter a descriptive **title** (e.g. “BSc Computer Science — Final Year 2026”).
4. Search **All Students** and **Add** each enrollee to the project roster (use the enrolment search — not the registry table search).
5. Click **Create project**. You are taken to the Setup wizard → **Students** step.

You can also enrol more students in the wizard via CSV import on the Students step, but the registry must already contain those students.

5 All Students (registry)

Before students appear in a project, they must exist in **All Students**.

5.1 Add students manually

Coordinator

Add a student to the registry

1. Sidebar → **All Students**

2. Click **Add student** (header button — opens the form below the page title)

3. In the **Add student** form, complete **Registration number** and **Name** (required), then optional Program and Batch

4. Click **Add student** in the form (not the table **Search students** field)

5. Confirm the new row appears in the registry table

5.2 Import students via CSV

Coordinator

Bulk-import registry students

1. All Students → **Import students**

2. Download the CSV template if needed

3. Upload your file; map columns to registry fields

4. Review import results (partial success shows row-level errors)

5. Download the error CSV if any rows failed

Figure 6: All Students registry with search, add, and import controls.

Figure 7: CSV column mapping interface during student import.

6 Setup wizard

Open a project → **Setup wizard**. Six sequential steps govern prerequisites:

Step	Tab	Purpose
1	Students	Enrol registry students into this project (CSV or manual).
2	Panels	Create panels and assign enrolled students.
3	Reviewers	Add reviewers, send portal credentials via email; bulk CSV import supported.
4	Reviews & rubrics	Define review rounds, build rubrics, confirm rubrics.
5	Panel assignments	Assign reviewers to panels per review round.
6	Open reviews	Activate marking per review round; open project for marking.

Figure 8: Setup wizard step navigation across all six steps.

6.1 Step 1 — Students

Coordinator

Enrol students in a project

1. Ensure students exist in **All Students** first.

2. Wizard → **Students** → **Import Students** (optional CSV enrolment).

3. CSV assigns existing registry students to panels and optional project titles.

4. Verify the enrolled list shows at least one student before continuing.

5. Click **Continue to Panels**.

⚠

Project CSV import does **not** create new registry students. Create them in All Students first.

Figure 9: Students wizard step with enrolled list and import option.

6.2 Step 2 — Panels

Coordinator

Configure panels

1. Add panels (e.g. Panel A, Panel B).

2. Assign each enrolled student to exactly one panel.

3. Resolve any unassigned students before continuing.

4. Click **Continue to Reviewers**.

Scorva: The Review Management System

E2E Coordinator pr_e2e_coordinator@example.test Log out

Enter students and panels, set up reviewers, define review rounds and rubrics, assign panels per round, then open or pause marking.

Draft project
Reviewers will not see assignments until you open this project for marking. Confirm rubrics on Reviews & rubrics, complete panel assignments, then start each round on Open reviews. [Open for marking](#)

[Students](#) [Panels](#) [Reviewers](#) [Reviews & rubrics](#) [Panel assignments](#) [Open reviews](#)

Panels
Create panels and assign every enrolled student. This is the project default template for Review 1; later rounds start as a copy of the previous review and can be changed on Panel assignments.

Panel name [Add panel](#)

SOP Panel 1781376984316 1 student [Reassign or unassign students before removing this panel.](#)

SOP-1781376984316-B — SOP Student B 1781376984316	Unassigned

1 student still unassigned.

Figure 10: Panels step with panel list and student assignments.

6.3 Step 3 — Reviewers

Reviewers do **not** need WordPress accounts. Scorva generates a secure portal URL + password for each reviewer and emails it directly.

Coordinator Add reviewers and send portal credentials

1. Add reviewers individually (name + email) or via **Import reviewers** CSV; assign each to a panel.
2. For each new reviewer row, click **Send credentials**.
3. Scorva emails the reviewer a personalised login URL and password. The status chip updates to **Sent <date>**.
4. If SMTP is not yet configured, the status shows **Generated, not delivered** — use **View link** to copy the portal URL and password manually, then share with the reviewer out-of-band.
5. To re-send the same credentials, click **Resend**. To issue a new password (invalidating the old one), click **Regenerate**.
6. Click **Continue to Reviews & rubrics** (or open that wizard tab).

View link opens a modal with a copyable login URL and password — useful when emailing manually or verifying the reviewer's link. **Regenerate** creates a fresh password and emails it automatically; the reviewer's previous password stops working immediately.

Scorva: The Review Management System E2E Coordinator [Log out](#)
pr_e2e_coordinator@example.test

Add reviewers to a panel; download a roster template pre-filled with your panels and existing reviewers; or import updates from CSV. Each reviewer receives a personal review link and password by email — no WordPress account needed. Reviewers who already received credentials are skipped unless you use "Resend to all".

Name	Email	Weight	Access	Panel coordinator	Actions
SOP Reviewer 1781376984316	pr_e2e_reviewer@example.test	1	Sent 2026-06-13	☐	Review link and password emailed to reviewer.

Figure 11: Reviewers step with roster, credential status, and action buttons.

6.4 Step 4 — Reviews & rubrics

Each **review round** has its own rubric. Rubrics follow a lifecycle:

State	Meaning
Draft	Editable; marking blocked.
Confirmed	Locked structure; marking can open.
Unlocked	Re-opened for edits; existing marks may be flagged.

Coordinator

Create and confirm a rubric

- Each project includes at least **Review 1**; add more rounds with **Add review round** if needed.
- In the rubric table, enter each criterion label and **Max marks** (required — total marks must not show “—”).
- Click **Save**, then **Confirm** on the rubric card.
- In the confirmation dialog, click **Confirm rubric** and verify the status chip shows **Confirmed**.
- If the **Panel assignments** wizard tab stays disabled, refresh the browser page (wizard step flags reload from the server).
- Repeat for each review round, then open **Panel assignments**.

**Re-confirming** a rubric after marks exist may **flag** changed criterion scores. Coordinators see flagged marks in progress views and exports. Always review the consequence summary before re-confirming.

Figure 12: Rubric builder with criteria, weights, and confirm action.

Figure 13: Rubric confirmation dialog with consequence summary.

6.5 Step 5 — Panel assignments

Coordinator

Assign reviewers to panels

1. For each review round, assign reviewers to panels.
2. Ensure every panel has the required reviewer coverage.
3. Resolve unassigned panels before continuing.
4. Click **Continue to Open reviews**.

Scorva: The Review Management System

Back to dashboard

Enrol students and panels, set up reviewers, define review rounds and rubrics, assign panels per round, then open or pause marking.

Draft project

Reviewers will not see assignments until you open this project for marking. Confirm rubrics on Reviews & rubrics, complete panel assignments, then start each round on Open reviews.

Open for marking

StudentsPanelsReviewersReviews & rubricsPanel assignmentsOpen reviews

Panel assignments

Assign each student to a panel for each review round. Review 1 defaults come from the Panels step; later rounds can copy the previous review. Save each row after editing. When every student has a panel on every round, continue to Open reviews to start or pause marking.

Review round

Review 1Copy from previous reviewReset to project defaults

Attendance correction

When all panel reviewers recorded the same attendance but that value is wrong, use **Correct attendance** on the student below. This updates every reviewer on that panel for **Review 1** only. Setting Absent clears all criterion scores for that student on this review.

Student	Project title	Panel	Actions
---------	---------------	-------	---------

Figure 14: Panel assignments matrix per review round.

6.6 Step 6 — Open reviews

Coordinator

Open marking

1. Activate marking for each review round individually.
2. When all prerequisites are met, click **Open for marking** at the project level.
3. Project status changes from **Draft** to **Active**.
4. Reviewers see assignments in their marking workspace as soon as they log in via their portal link.

Figure 15: Open reviews step with per-round activation and Open for marking button.

7 Progress monitoring

Sidebar → **Progress** (within a project).

Use this **control room** to identify incomplete marking before closing:

- Accordion by review round → panel → reviewer
- Completion percentages and mark status counts
- Student-level score breakdown (read-only; totals are server-computed)
- Flagged marks highlighted

Coordinator

Chase incomplete marking

1. Open Progress for the project.

2. Expand review rounds with less than 100% completion.

3. Identify panels/reviewers with **Not started** or **In progress** marks.

4. Contact reviewers directly (outside the plugin) or use **Resend** on the Reviewers wizard step to re-email their portal link.

5. Refresh progress after marking sessions.

Figure 17: Pending panel unfreeze requests on the coordinator dashboard.

8 Reports & exports

Sidebar → **Reports**. Four live tabs plus downloads:

Tab	Purpose
Rubric marks	Live matrix of criterion marks by student/reviewer. Export CSV/Excel.
Overall scores	Combined weighted scores per student. Export CSV/Excel.
Consolidated	All students across all confirmed review rounds. Export CSV/Excel.
Downloads	Committee deliverables: panel roster, marks matrix, scores matrix, offline scoring PDF.

8.1 Locking reports

Coordinators can **lock** report views to prevent further mark changes during export finalisation, and **unlock** when needed.

Figure 18: Reports page tab navigation and review round selector.

Listing 2: Rubric marks live matrix with sort and export buttons.

📸 Screenshot to capture: Rubric marks tab populated with data. Include column headers, a few student rows, and CSV/Excel export buttons.

Figure 19: Downloads tab with project-wide and per-review report cards.

8.2 Offline scoring sheet (PDF)

The **Offline scoring sheet** PDF supports paper-based backup marking. Generate it from the Downloads tab per review round.

Listing 3: Offline scoring sheet card on the Downloads tab.

 *Screenshot to capture: Downloads tab focused on the Offline scoring sheet card with download button visible.*

9 Panel Report settings

Sidebar → **Settings** → **Panel Report** (within a project).

Configure panel report PDF content and branding used by panel heads when generating panel reports.

Figure 20: Panel Report settings page for a project.

10 Audit log

Sidebar → **Audit log**.

Review governance actions: mark overrides, rubric unlocks, session close/reopen, and other audited events. Each entry includes actor, timestamp, and reason where applicable.

Figure 21: Audit log listing governance events for a project.

11 Closing & reopening a project

Sidebar → **Close project** (End project section).

Closing a project stops marking and may disable reviewer portal access. Export all committee deliverables **before** closing.

Coordinator

Close a project safely

1. Complete the pre-close checklist links: Progress → Reports (Downloads) → Audit log.
2. Open **Close project**.
3. Review the close preview (active reviewers, incomplete marks warning).
4. Optionally check **Also disable provisioned reviewer accounts**.
5. Confirm in the dialog. Project status becomes **Closed**.

Figure 22: Close project page with pre-close checklist and preview.

Coordinator

Reopen a closed project

1. On the Close project page for a closed project, click **Reopen project**.
2. Confirm in the dialog. Status returns to **Active**; marking rules apply again.

Part II

Reviewer procedures — portal login, assignments, marking, freeze, panel head tasks

12 Reviewer overview

You only see students **assigned to you**. You cannot access other panels or unassigned students.

13 Portal login

Open the invitation email from your coordinator and click the **Review link**. You will see the password entry screen.

Figure 23: Portal login screen — password entry after clicking the review link.

Reviewer

Log in via the portal

1. Open the invitation email and click **Review link** (or copy-paste the URL).
2. Enter the **Password** from the same email.
3. Click **Open review portal**.
4. You are taken directly to **Your assignments**.
5. If you receive a new invitation email (after **Regenerate**), the previous password no longer works — always use the latest email.

Do not share your portal link or password. The link is personal and grants direct access to your marking workspace without any additional login step.

14 Your assignments

After portal login, the **Your assignments** page lists available and blocked assignments.

- **Available** assignments — rubric confirmed, project active, marking activated → click to open marking grid
- **Unavailable assignments** — setup incomplete; message explains why (e.g. rubric not confirmed, project closed)

Figure 24: Reviewer assignments page with available and unavailable cards.

Blocked reason	What it means
Project not open	Coordinator has not clicked Open for marking.
Rubric not confirmed	Coordinator must confirm the rubric on the wizard.
Marking inactive	Coordinator must activate this review round.
Project closed	Marking has ended for this project.
Coordinator locked	Coordinator locked marks for this review round.

15 Marking grid

Click an assignment card to open the **marking grid** — all students in your panel for that review round.

Features:

- Row per student with registration number, name, project title
- Quick status chips (not started / in progress / complete)
- Attendance indicator
- **Update score** on each row opens the rubric form in a modal
- **Freeze scores** (panel-level) when all marks are ready for coordinator reports

(SOP-1781376984316-B)

Present

Not started

R1 —

Figure 26: Mobile card layout for the marking grid.

16 Entering marks (rubric form)

Reviewer

Mark a student

1. Open the marking grid for your assignment.

2. Click **Update score** on a student row (do not use **Freeze scores** unless you intend to lock the whole panel for that review).

3. In the modal, set **Attendance** (Present / Absent) if shown.

4. Enter a score for each criterion (half-point increments where enabled); scores are validated against max marks inline.

5. Click **Save** to store a **Draft** mark; the grid shows the score and draft status.

6. Repeat for each student, then use **Freeze scores** when the panel is complete.

Draft marks can be edited until you freeze scores or the coordinator locks the review. If you see **No assignments yet**, contact your coordinator — they may need to send your portal credentials or open the project for marking.

Figure 27: Score entry modal (rubric form) with criterion scores and attendance.

Figure 28: Inline validation error on rubric form.

16.1 Flagged marks

If a coordinator re-confirms a rubric after you submitted marks, affected scores may show a **flagged** indicator. You may need to review and re-submit. Contact your coordinator if unsure.

Listing 4: Flagged mark indicator on a criterion score.

 *Screenshot to capture: Student row or rubric form showing a flagged mark chip on at least one criterion.*

17 Freezing & unfreezing scores

When you have submitted marks for all students in your assignment:

Reviewer Freeze your scores

- On the marking grid, click **Freeze my scores**.
- Read the confirmation dialog.

- 3. Confirm. Your marks become read-only.
- 4. To edit after freezing, submit an **unfreeze request** with a reason.

Figure 29: Freeze my scores confirmation dialog.

Reviewer

Request an unfreeze

- 1. On a frozen assignment, click **Request unfreeze**.
- 2. Enter a brief reason (required).
- 3. Submit. Status shows **Pending** until a coordinator or panel head acts.
- 4. When approved, you can edit and re-freeze.

Figure 30: Unfreeze request form with reason field.

18 Panel head responsibilities

If you are designated **panel head** (panel coordinator) for a panel, your assignment card also links to **Panel report**.

Panel heads can:

- Generate the panel report PDF for their panel
- Approve or deny unfreeze requests from co-reviewers on the same panel

Figure 31: Assignment card showing Panel report link for panel heads.

19 Troubleshooting

Problem	Likely cause	Who fixes
Cannot see any assignments	Credentials not sent, portal session expired, or setup incomplete	Coordinator
Portal link says “not valid”	Using an old invitation email — regenerated token replaces the previous one	Reviewer — open latest email
Stuck after filling reg. no. on registry	Used table search instead of Add student form — fill Name and submit form	Coordinator
Panel assignments tab disabled	Rubric missing max marks or not confirmed — refresh page after confirm	Coordinator
Assignment listed as unavailable	Rubric unconfirmed, marking inactive, or project closed	Coordinator
Score will not save	Project closed, coordinator lock, or panel frozen	Coordinator / Panel head
Wrong max marks error	Score exceeds criterion max	Reviewer — correct the value
Attendance conflict	Co-reviewers disagree on attendance consensus	Reviewers — align; Coordinator if stuck
Portal session expired mid-session	Token session timed out — revisit portal URL and re-enter password	Reviewer
Status shows “Generated, not delivered”	SMTP not configured or email bounce — use View link to share credentials manually	Coordinator
Export empty or missing columns	Rubric not confirmed or no marks submitted	Coordinator

20 Quick reference card

Coordinator checklist

- ☐ All Students populated
- ☐ Project created
- ☐ Panels & reviewers configured
- ☐ Credentials sent to reviewers
- ☐ Rubrics confirmed
- ☐ Panel assignments complete
- ☐ Open for marking
- ☐ Progress monitored
- ☐ Reports exported
- ☐ Project closed

Reviewer checklist

- ☐ Open portal link from invitation email
- ☐ Enter password → Open review portal
- ☐ Open assignment
- ☐ Mark all students
- ☐ Submit (not just draft)
- ☐ Freeze scores
- ☐ Panel report (if panel head)

One-page process flow

Quick reference · tear-out page

End-to-end lifecycle · Coordinator setup gates reviewer marking

Coordinator: /reviews/ → WP login · Reviewer: open portal link from email → enter password

COORDINATOR · [/reviews/](#)

Registry · manual add or CSV import

Dashboard → title · status: Draft

Students $\rightarrow$ Panels $\rightarrow$ Reviewers

Build criteria · Confirm rubric

Reviewers blocked until this step completes

Assign reviewers to panels per round

Activate rounds · Open for marking → Active

Draft

7

[illegible]

21 Document maintenance

Item	Detail
Source file	<code>docs/sop/project-reviews-sop.typ</code>
Theme	<code>docs/sop/lib/theme.typ</code> — <code>sop-screenshots-dir</code> , <code>use-live-screenshots</code>
Regenerate captures	<code>npm run build</code> then <code>npm run sop:screenshots</code> from plugin root; copy printed <code>sop-screenshots-dir</code> into <code>lib/theme.typ</code>
Compile PDF	<code>cd docs/sop && typst compile project-reviews-sop.typ</code>
Output	<code>docs/sop/project-reviews-sop.pdf</code>
